NUVEQ

Smart, Secure, and Centralized Access Control for City Governments

Manage municipal buildings, public facilities, and government offices with a scalable, cloud-based access control solution that ensures safety, transparency, and compliance.

Managing security across a diverse portfolio of public facilities is inherently complex.

Every local government is responsible for a wide range of buildings, each with unique access needs and security requirements. A one-size-fits-all approach is no longer viable.

City Hall

Police and Fire Departments

Libraries

Recreation Centers

Public Parks

Senior Centers

Utilities Offices

Data Centers

Fragmented systems create security vulnerabilities and operational inefficiencies.

Traditional, on-premise solutions struggle to keep pace with the demands of a modern city, leading to:

Security Gaps
Multiple, disconnected systems make it impossible to enforce consistent security standards across all buildings.
High Maintenance Costs
Reliance on physical on-site servers and complex manual maintenance drains budgets and IT resources.

Lack of Central Oversight
Without a single dashboard, real-time monitoring and emergency response are slow and uncoordinated.
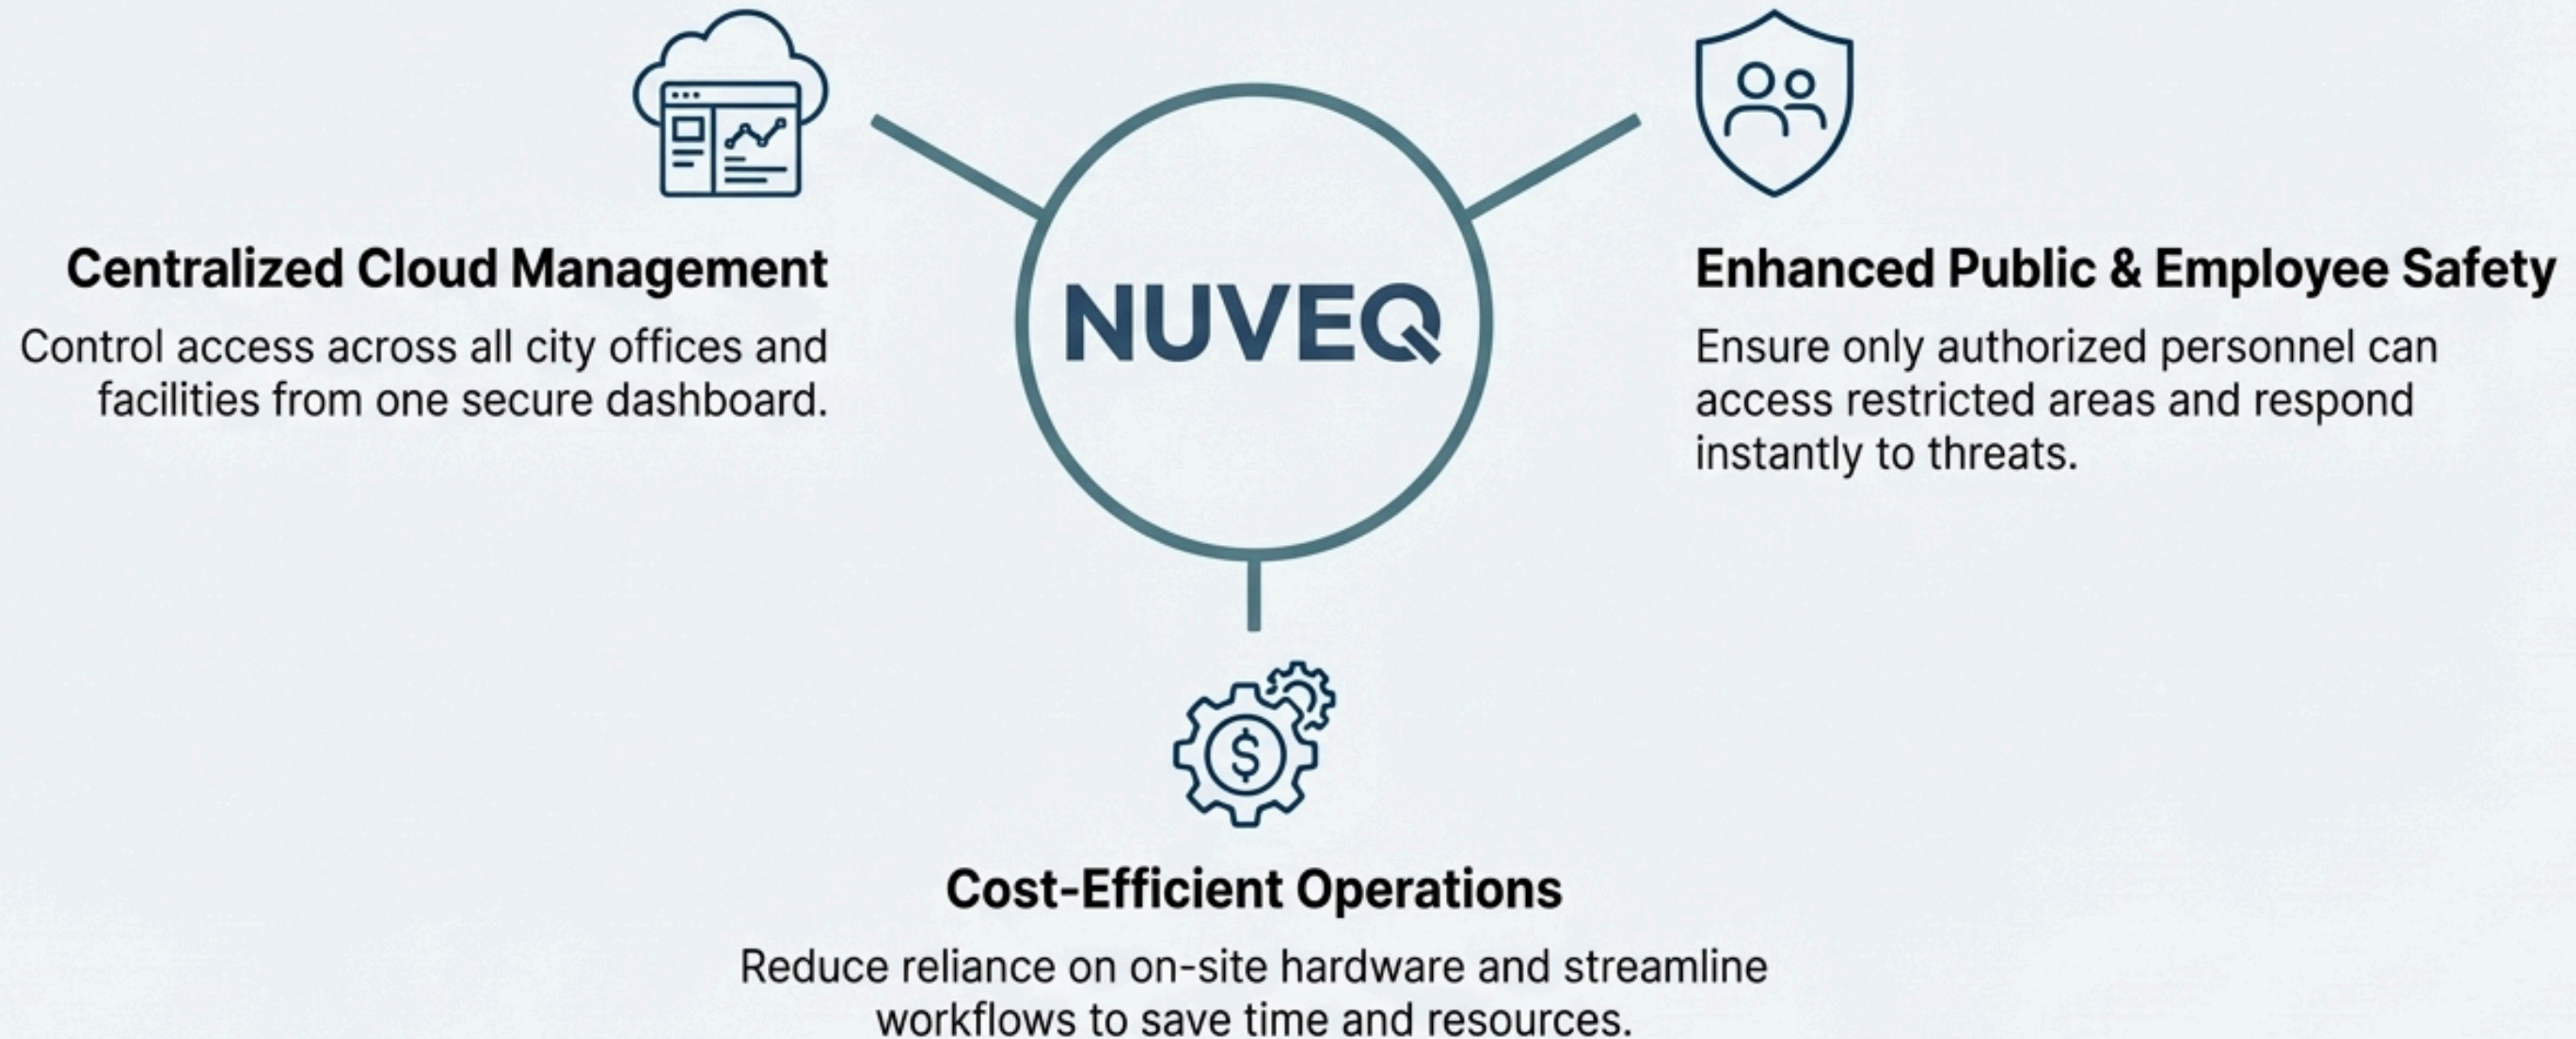

Poor User Experience
Cumbersome processes for employees, contractors, and the public lead to frustration and lost time.

NUVEQ

NUVEQ provides a unified platform designed for the unique needs of local government.

We replace complexity with a single, state-of-the-art solution built on three core pillars:

Centralized Cloud Management
Control access across all city offices and facilities from one secure dashboard.

NUVEQ

Enhanced Public & Employee Safety
Ensure only authorized personnel can access restricted areas and respond instantly to threats.

Cost-Efficient Operations
Reduce reliance on on-site hardware and streamline workflows to save time and resources.
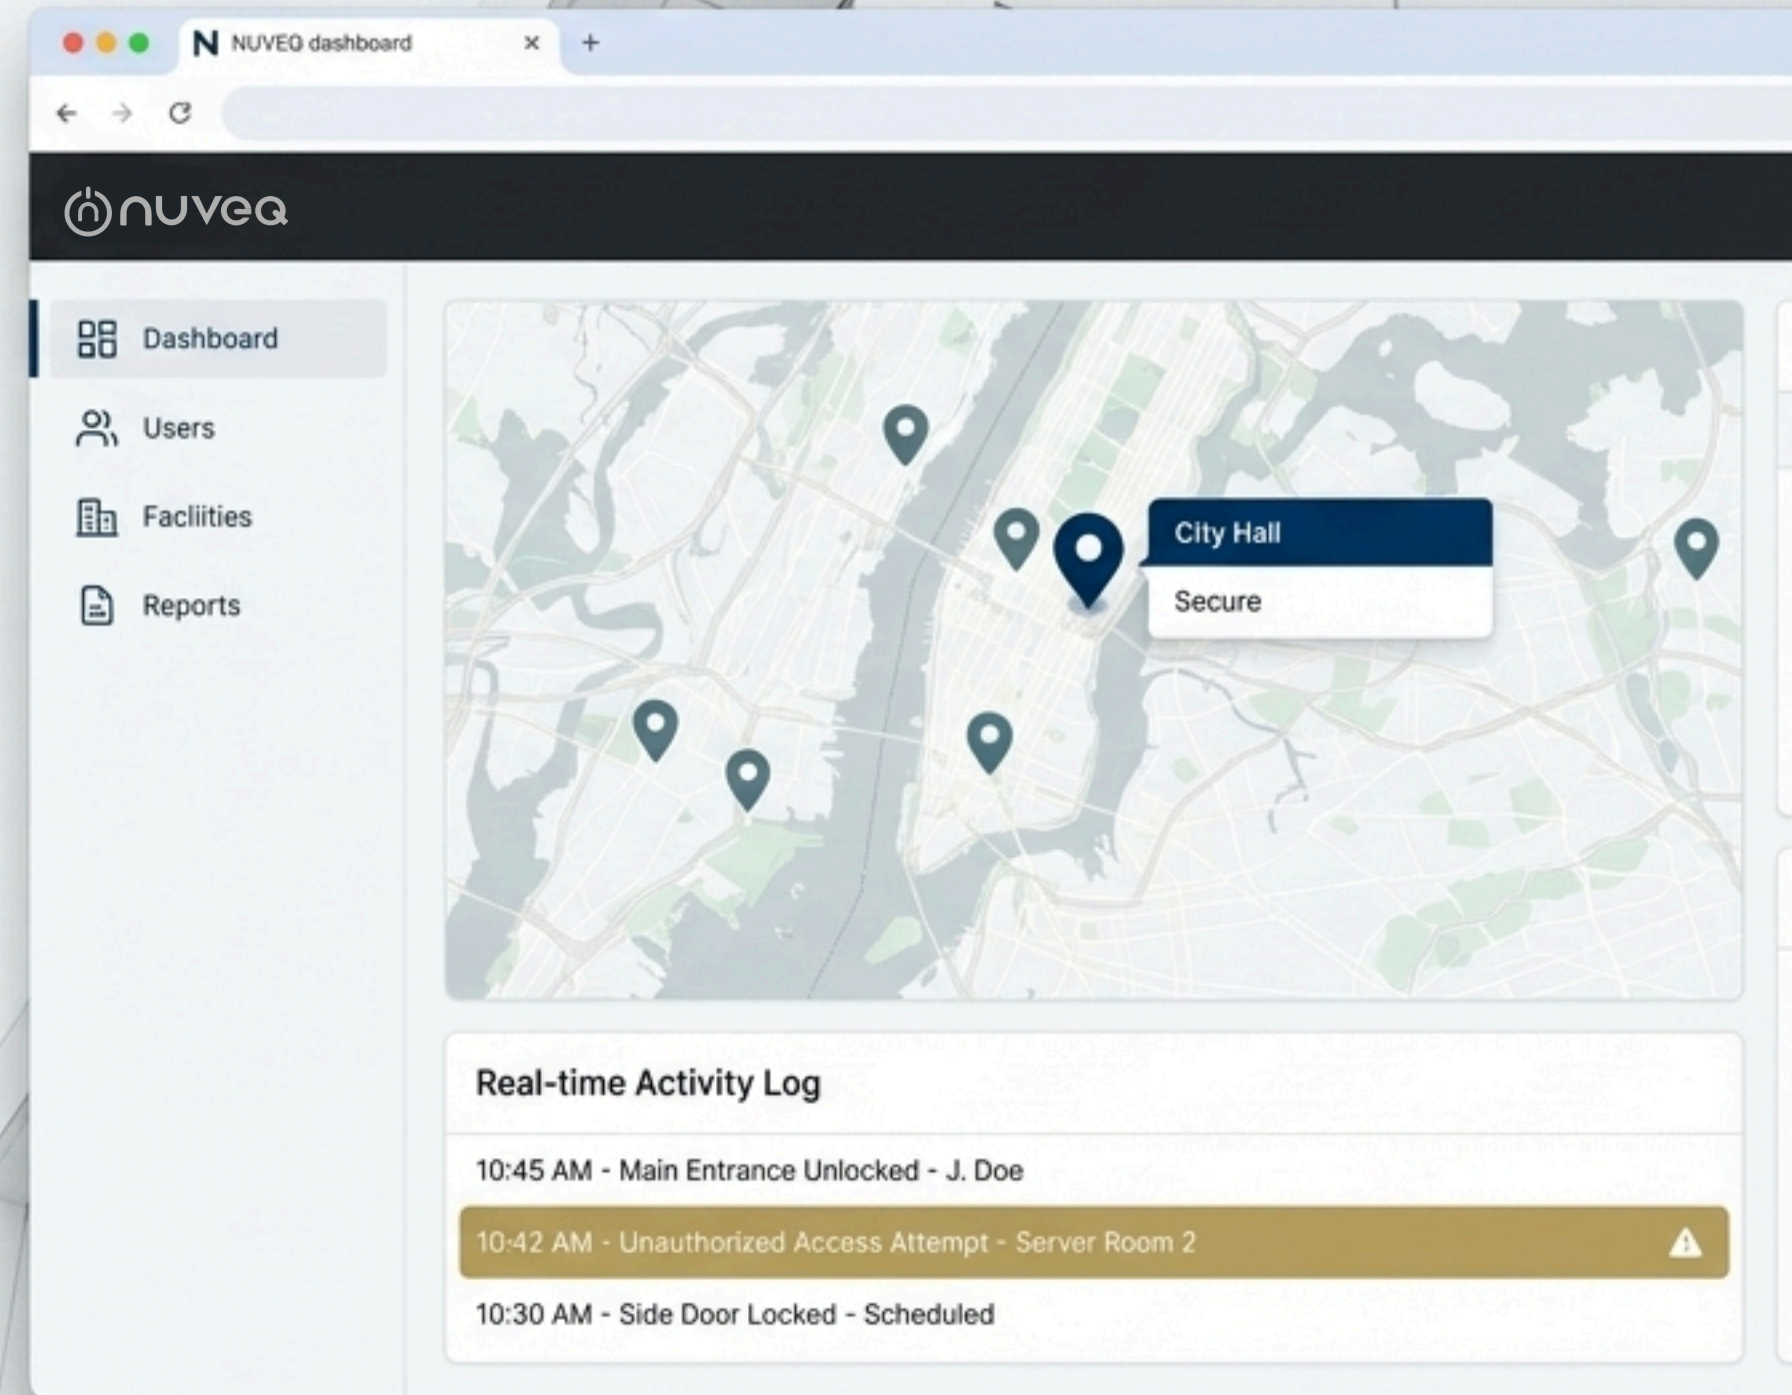

NUVEQ

Control every facility from one secure, centralized dashboard.

The NUVEQ Cloud Management Platform is the heart of your security infrastructure. Built on the **Google ULTRA SECURE Cloud Platform**, it allows you to:
- **Manage Globally, Act Locally:** Oversee all locations remotely, locking or unlocking individual doors or entire premises as needed.

- **Automate Schedules:** Set up automatic locking and unlocking schedules to minimize manual intervention and ensure consistent security.

- **Scale Effortlessly:** Add new facilities—from a new library to a temporary event space—without costly hardware expansion.

Intelligent IoT controllers connect every access point to the cloud.

Our family of Smart IoT Controllers are the secure link between your physical hardware and the cloud platform, ensuring reliability and real-time communication. This ecosystem includes specialized modules for:

IoT Elevator Access System

IoT Vehicle Access Control (ANPR)

IoT Inputs/Outputs Module

IoT Panic Alarm System

IoT Server Rack Lock
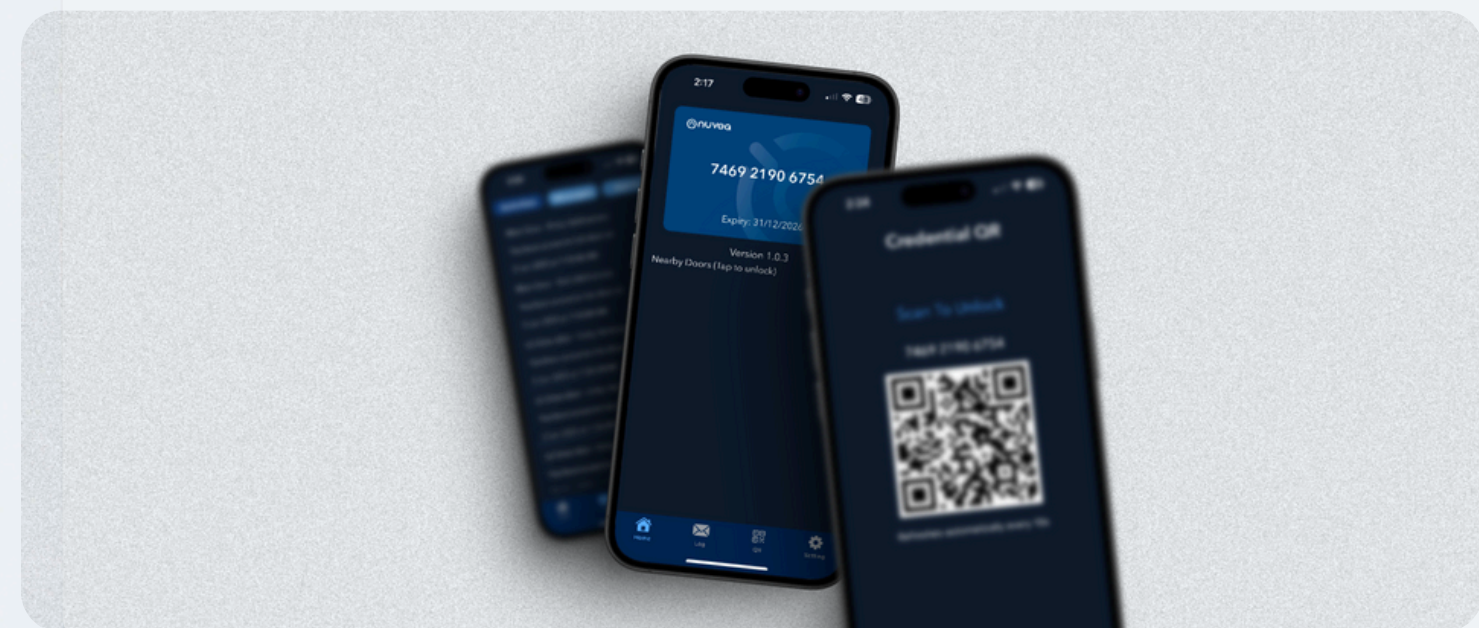

IoT Door Monitoring System

Modern credentials and smart readers provide flexible, secure access.

Provide seamless access for employees, contractors, and the public with a range of modern, secure options. Our hardware supports:
Mobile Credentials: Unlock doors with a single tap of a smartphone using our Mydigital ID.

Multi-format Readers: A single reader accepts multiple formats: BLE (Bluetooth), NFC, and QR codes for visitor passes.

AI Biometrics Recognition: For high-security areas, deploy advanced indoor and outdoor (IK10-rated) face recognition terminals.

Encrypted NFC Cards: For users who still require a physical credential, our encrypted cards offer enhanced security.

YOUR PHONE IS YOUR KEY
Access Control at the Speed of Your Business

nuveq

Secure perimeters and manage public flow with integrated physical barriers.

Extend cloud-based control to your building's perimeter, parking entrances, and high-traffic internal areas with our robust line of security gates and turnstiles.

Tripod Turnstile

Swing Turnstile

NUVEQ

Streamline public access and secure sensitive areas with granular controls.

Our features are purpose-built to solve common municipal challenges:

Feature: Visitor Management Integration

Benefit: Simplify how citizens and vendors check in. Enable pre-registered appointments, issue digital QR-based passes, and reduce reception wait times while maintaining a full visitor log.

Feature: Access Groups & Role-Based Permissions

Benefit: Ensure sensitive areas—like archives, council chambers, or IT server rooms—are protected at all times, while giving employees and contractors the exact access they need, when they need it.

Enhance emergency preparedness and response capabilities across all facilities.

NUVEQ's platform provides tools to protect people and property during critical events:

Feature: Emergency Lockdown

Benefit: Instantly secure all or select doors across one or multiple facilities from the central dashboard or mobile app in response to a threat.

Feature: Fire Alarm Integration

Benefit: Automatically unlock designated emergency exit routes upon a fire alarm trigger, ensuring safe evacuation.

Feature: Real-time Monitoring & Intrusion Alerts

Benefit: Receive instant notifications of any unauthorized access attempts or security breaches, enabling rapid response.

NUVEQ

The result is a safer, more efficient, and future-proof city infrastructure.

Key Benefit 1: Streamlined Operations

- ✓ Effectively oversee all facilities from a single dashboard.
- ✓ Save time by sending temporary digital keys to vendors and visitors.
- ✓ Reduce manual workload with system integrations and automations.

Key Benefit 2: Uncompromising Security

- ✓ Enforce consistent security standards across all buildings.
- ✓ Implement advanced measures like two-factor authentication and anti-passback.
- ✓ Ensure system uptime with offline capability during network failure.
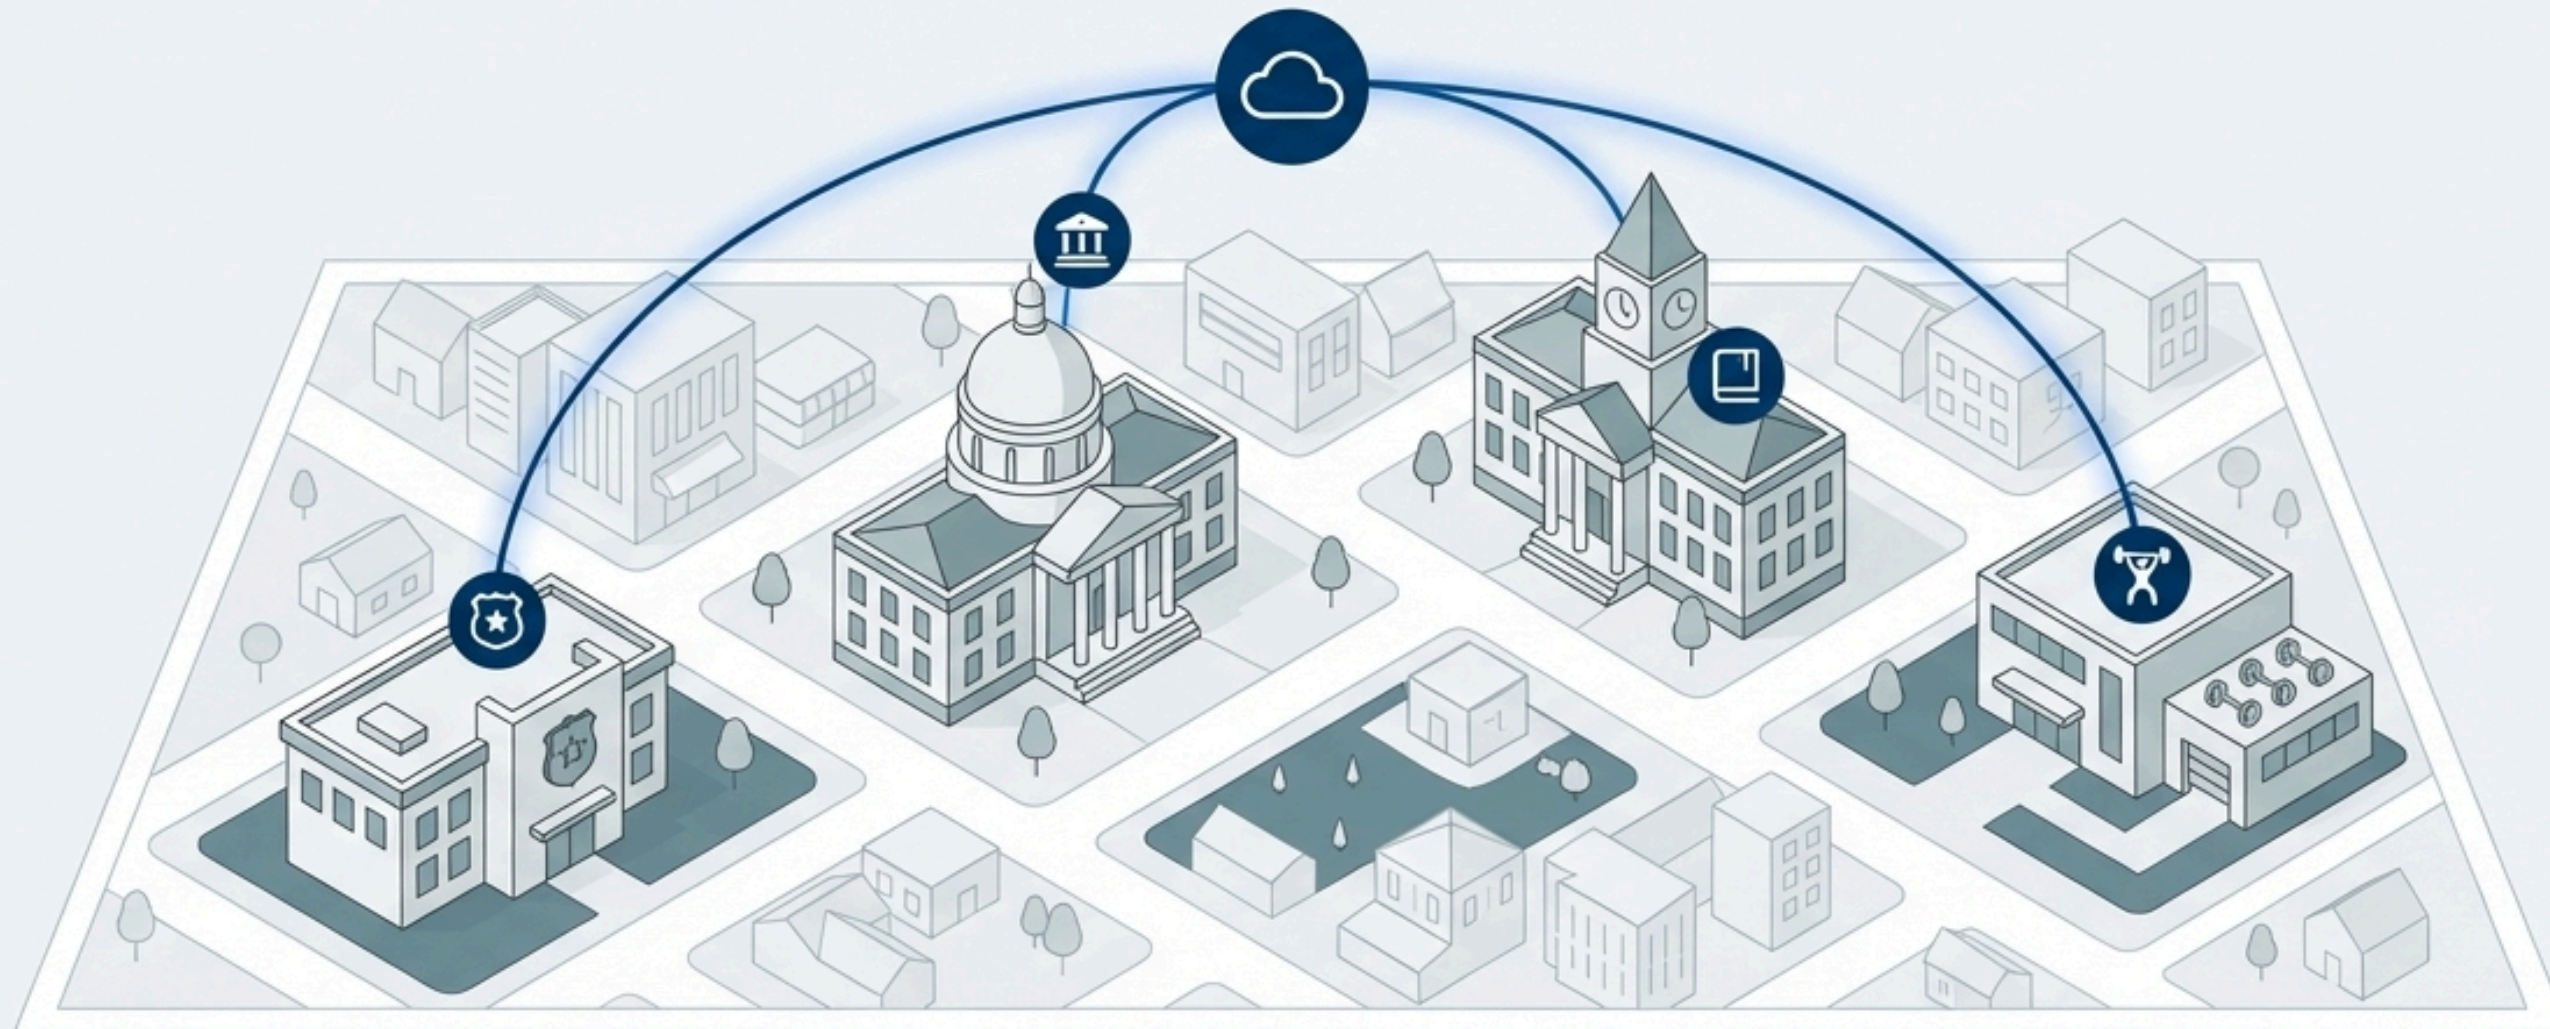

Key Benefit 3: Future-Proof Investment

- ✓ Receive limitless system improvements via over-the-air (OTA) updates.
- ✓ Prevent vulnerabilities with a constantly evolving, modern platform.
- ✓ Integrate with future technologies using our robust developer API.

NUVEQ

A scalable solution tailored to every facility, from City Hall to community parks.

NUVEQ's flexible architecture allows you to apply the right level of security to each unique environment, all managed under one unified system.
nuveq

Synchronize and expand with your existing technology stack.

NUVEQ is designed to be a central part of your city's technology ecosystem, not another silo.

Connect and Sync: Minimize security threats by connecting NUVEQ with your existing user directories to keep information up-to-date across all platforms.

Integrate with Enterprise Software: Enhance efficiency by integrating NUVEQ with HRMS, data analytics tools, and other essential software.

Custom Development: Utilize our Developer API to build customized integrations with your preferred software solutions to streamline processes.
