# NUVEQ CLOUD ACCESS MANAGEMENT PORTAL

CLOUD-BASED ACCESS CONTROL SYSTEM | MOBILE ACCESS

## MANAGE FROM ANYWHERE

Access Nuveq's multi-site management platform on any web-enabled device to easily administer credentials, revoke access and customize entries across all locations.

## CLOUD-BASED SOFTWARE

Scalable management and real-time reporting. Set schedules and access permissions for all your locations, in one simple interface

## AUTOMATIC SOFTWARE UPDATES

Experience future-proof access control that's always secure, and always up-to-date. The Nuveq EP-3000 updates automatically as new software features and security enhancements become available.

## NUVEQ CLOUD ACCESS PORTAL ANYWHERE. ANYTIME. ANY DEVICE

Nuveq Cloud Access Portal is the future of access control. It is a single place where you can manage your entire Access control & security, from any web browser, in any location. No longer centred around a physical server, your needs are now easily met, from a small office with a single door to the largest corporation with thousands of offices worldwide. Manage all your doors with a single interface and have a centralised record of all your access activities for all your branches located anywhere.

## CORE TECHNOLOGIES

Cloud-Based

Flexible Access

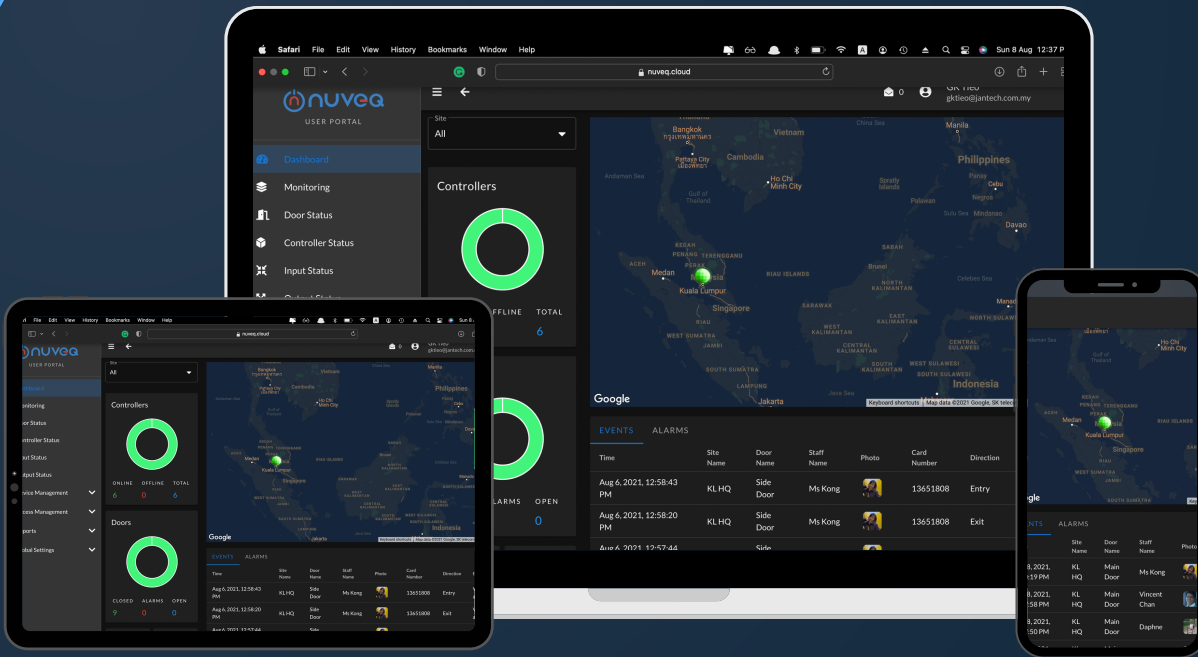

Remote management

Plug n' Play Connectivity

# NEXT-GENERATION ACCESS CONTROL

CLOUD-BASED ACCESS CONTROL SYSTEM | MOBILE ACCESS

Nuveq provides the most powerful and streamlined access control platform on the market. Experience full configuration and management from any internet -connected device. Manage users, create groups, open and close doors, set system rules, get Apps notifications & email alerts, and more. All in a unified Cloud management portal

Google Cloud Platform

## SECURING YOUR FUTURE

Hosted on Google Cloud as the cloud provider for all services, we utilize their mature and stable cloud solutions like the IOT core, Cloud SQL , Pub-Sub, and Compute engines. All these products are infinitely scalable to fit you projected needs. Uptime, security and reliability by using Google and lessen your concerns of server failure, attacks and hacking.

## MEET THE BRAIN BEHIND THE OPERATION

Nuveq's cloud-based software is scalable, reliable and easy to use. Our open API makes integrating with your favourite tools to snap and our end-to-end encryption means you can rest assured that your system is secure. Our cloud-based platform is the most flexible collaborative and reliable access control system ever developed. And with every seamless update. It just keeps getting better
